To whom it may concern,

Going forward it is the policy of the Newbury Fire Dept, that any hot work on Plum Island be conducted in conjunction with a fire detail, as well as any inside work at any other structure within the town. There are limited conditions in which this may be overturned, through proper planning and review by the Board of Fire Engineers. Any cutting, welding, or other hot work requires a Permit for hot work, \$50, and a Fire Detail which requires a truck and trained firefighter to standby from the start of the work to 30 minutes after the work has been completed. The cost of details is \$58.00/hour per firefighter with a 4 hour minimum, applicable vehicles are as follows: All apparatus is \$50.00 per hour. The Newbury Fire Department will send you an invoice when the detail has been completed. Should you need to cancel a scheduled detail, the cancellation notice must be received by the Newbury Fire Department at least 48 hours prior to the commencement of the detail.

Failure to provide the 48 hour cancellation notice will result in a charge of two (2) hour minimum per scheduled firefighter and apparatus.

Thank You for your cooperation.
